

Space Age Education

The unique, memorable and educational experience at Space Camp really does have the students 'reaching for the stars' while

being challenged with hands-on exposure to mathematics and science.

The 10-day all inclusive visit is centred around the US Space & Rocket Center, www.spacecamp.com, where the students will complete the advanced Space Academy Course in a safe and stimulating environment while carrying out astronaut training.

Among the highlights of the course are the 'G-Force Accelerator', '1/6th Gravity Chair', 'Multi-Axis Trainer', 'Space Shot', and 'Area 51' where the students complete physical and mental tasks which require them to work as a team.

The students also have seminars and lectures ranging from astronomy to space engineering where they appreciate how the skills taught in school and during the course are relevant to their lives and to possible future careers.

The course culminates in a five hour mock mission using world class simulators where the students rely on their training as Mission Specialists or Pilots in order to take command of an orbiter on its flight to the International Space Station to repair a satellite and then return safely home.

As well as the Space Camp experience the groups also have a tour of the area to give them a flavour of the history and culture of Alabama. They visit some of the Huntsville tourist attractions such as Burritt on the Mountain, Cathedral Caverns and SciQuest along with attending a local American football or basketball game.

Established by teachers with a wealth of experience in the organisation of school trips, Gifted Tours have established themselves as the UK specialists when it comes to arranging school visits to the US Space Camp in Huntsville, Alabama.

With 10 years of Space Camp experience Gifted Tours offer and arrange this unique all inclusive visit from a teachers perspective and relieve schools of much of the preparation and time consuming work associated the organisation of school trips. Director of the company, Ken Lewis, has been appointed as the official Space Camp Ambassador for the UK as an authorised representative of Space Camp and the U.S. Space & Rocket Center.

Visit the Gifted Tours website www.giftedtours.co.uk for more details of this amazing educational opportunity and contact Ken or Jane Lewis at info@giftedtours.co.uk

SPACE CAMP USA

WOW!

Take your students on this unique 10 days all inclusive trip that includes a 6 day residential **ADVANCED SPACE ACADEMY® COURSE** at the **U.S. SPACE & ROCKET CENTER®**, suitable for years 10, 11 & 12. It will stretch their abilities, in a fun and educational way.

'Gifted Tours' Britain's # 1

U.S. Space Camp tour operator for school groups
